ARRAS

REGIMENTAL HISTORY, THE QUEEN'S ROYAL REGIMENT, VOL. VII.

1:40,000

INSTRUCTIONS AS TO THE USE OF THE SQUARES.

1. The large rectangles on the map, lettered A, B, C, etc., are divided into squares of 1,000 yards side, which are numbered 1, 2, 3, etc. Each of these squares is sub-divided into four minor squares of 500 yards side. These minor squares are considered as lettered a, b, c, d. (See Square No. 6 in each rectangle).
2. To locate a point within a small square, consider the sides divided into tenths, and define the point by taking so many tenths from W to E along Southern side and so many from S to N along Western side; the S.W. corner always being taken as origin, and the distance along the Southern side being always given by the first figure. Thus the point Z would be 63; i.e. 6 divisions East and 3 divisions North from origin.
3. When more accurate definition is wanted (on the 1:20,000 or 1:10,000 scales) use exactly the same method, but divide sides into 100 parts and use four figures instead of two. Thus 0847 denotes 08 parts East and 47 parts North of origin (see point X). Point Y is 6503.
4. Use 0 but not 10; use either two or four figures; do not use fractions (e.g., 4.5).
